

Quality paper made in France, in the heart of the Limousin region.

BVCert. 6020050

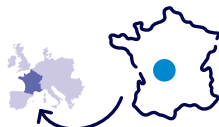

Our mill in Saillat-sur-Vienne is dedicated to producing the paper that people depend on every day for so many uses.

Products that are recyclable and made from renewable resources, using certified fibres sourced exclusively from sustainably managed forests.

Fully integrated mill

Positioned in the heart of the heavily forested Limoges region.

Thanks to our fully integrated mill, we can directly manage the pulp and paper manufacturing process, from wood to ream.

The only integrated mill in France for graphic papers.

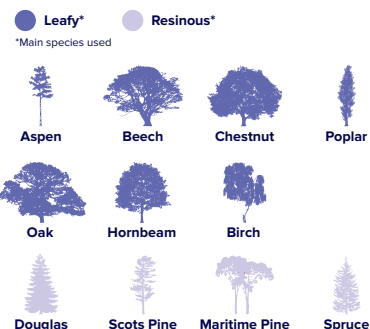

Managing a natural resource: the forest

Responsible and sustainable sourcing

Local wood: Over 35 species of wood reflecting the local biodiversity. The wood comes from sustainably managed forests (PEFC, FSC®, FSC® Controlled Wood, PEFC Controlled Sources).

No large-scale industrial planting.

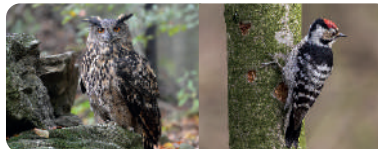

Short supply chain:
The wood comes from an average distance **130 km** from the plant.

Biodiversity protection

We participate in projects to protect the biodiversity of French forests.

132
protected habitats

2 386
protected animal species

Together with WWF®, engaged into biodiversity protection. Developed a biodiversity toolbox with FSC®/WWF & Sylvamo Forêt Services.

REY® Adagio supports a biodiversity conservation initiative in France. The project covers a Natura 2000 protected area of 3.86 hectares in Sainte-Gemme, France.

Responsible and sustainable production

Circular economy

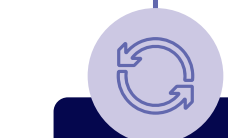

Energy recovery
85 % of the energy produced on site is from biomass

Water quality
94 % daily used water returned to the river

Waste recycling
90 % of waste returned in the production process or reused for beneficial purposes

The carbon footprint of an average A4 ream 80 gsm produced in Saillat is **0.895 g CO2-eq***.

*Calculated using CEPI 10 TOES methodology from source to mill.
Data for 2023.

Safety

People before paper, safety first.

We are committed to reducing the number of accidents in the workplace to zero through training and the ongoing review of processes.

**ZERO
ACCIDENT
OBJECTIVE**

Local communities and CSR projects

710 on-site jobs at Saillat (563) and in the CBB and SFS

4 000 indirect jobs in the region

Cendrecor partnership

105 neighbouring farmers supplied with 12,000 tons of wood ashes to fertilize 10,500 hectares every year.

Partnership with a local ESAT

(disabled people work integration) to carry out specific tasks in our workshops.

Deeply rooted locally

The local economies benefit not only from local procurement, but also from the **direct** and **indirect employment** created by our activities in the regions.

In France

The Telethon charity in France, is a medical institute that is dedicated to help ill children and investigate rare genetic disease. **REY® is proud to have donated to this charity** for many years.

In Europe (except France)

As part of our commitment to reducing greenhouse gas emissions, we are working with ClimatePartner to disclose the carbon footprint of our white paper products from Saillat. Discover more about Sylvamo®'s climate action and ClimatePartner's certification.

Value for money

High-volume printing

Jam resistant

REY® ream packaging is made from paper.
It can be recycled with regular paper waste.

Excellent colour reproduction

Premium look

Superior white

Wide variety of colours

High-impact

Efficient filling

Saillat-sur-Vienne Mill

The Saillat mill in Limousin, France, founded in 1894, produces office papers and value added grades in cut size, reels or folio formats. The mill also sells market pulp in France and other European countries. Significant investments have been made over the years to enhance the mill's environmental footprint and the quality of Saillat's products, making it a European leader in the production of value-added papers. Saillat mill is a major economic player, creating over **4,500 jobs** (direct and indirect) and engaging in circular economy practices through partnerships with local farmers.

Saillat is also strongly committed to responsible environmental management, resulting in **85% autonomy** in biomass energy. It holds various certifications, including **ISO 9001, ISO 14001, ISO 45001, ISO 50001, FSC®, PEFC, Ecolabel, and Origine France Garantie**.

Saillat's facilities combine the mill and forestry operations managed by Comptoir des Bois de Brive (CBB) and Sylvamo Forêt Services.

Comptoir des Bois de Brive

Comptoir des Bois de Brive (CBB), the wood-sourcing arm of Sylvamo Saillat, manages 1.5 million tons of wood annually from central western France, with over 85% supplied to the mill. With over 100 years of expertise, CBB purchases stumpage and harvests timber, while also sourcing fiber from forest companies and sawmills. **It plays a vital role as a local supplier for various wood industries, including sawmills, panel makers, and heating systems.**

Sylvamo Forêt Services

Sylvamo Forêt Services, a local subsidiary, aids environmental efforts at CBB and assists companies in fulfilling CSR goals with community-centric projects. It offers forest owners consulting, property diagnostics, management documents, administrative support, and FSC® and PEFC certification services.
