

**REY® paper is there for every important moment in life, meeting both office and educational needs.**

#### High-Quality Paper for Every Need

A wide range of certified white and tinted papers perfect for various printing and copying needs, whether for office, school, or home use.

#### Versatile Range

Available in multiple formats and grammages, REY® Paper is the ideal choice for any occasion.

#### ColorLok Technology

Ensures brighter colours and bolder blacks for better print quality.

#### Sustainability & CSR initiatives

At REY®, we're committed to making a positive impact beyond high-quality products by fostering a more inclusive and sustainable future.

#### Sustainable sourcing

REY® Papers are PEFC or FSC® certified, the fibres are coming exclusively from sustainably managed forest.

#### Responsible operations

We continue to reduce our greenhouse gas emissions and generate more than 85% of our mills energy from renewable biomass residuals.

#### Thriving people and communities

We support local communities, supporting childhood education initiatives and creating employment opportunities for individuals with disabilities in specific tasks.

#### REY® Office - The paper with a climate action.

REY® Office is ClimatePartner certified, which means that it complies with the 5 steps of climate action: measure carbon footprint, set reduction targets, implement reductions, finance climate project and communicate transparently.

contribute

This climate action project provides improved cookstoves, water filters, and solar lamps to vulnerable communities in India, supporting women in making the transition to clean energy. In a country where millions still rely on polluting open fires and kerosene lamps, this initiative tackles both environmental and health challenges — reducing carbon emissions, preventing deforestation, and combating indoor air pollution that causes over 600,000 deaths annually.
